

Pesticide Application

In conformity with all applicable statutes, the intent of this policy is to ensure that staff, students, and parents/guardians receive adequate advance notice of pesticide applications in school buildings or on school grounds. Further the District will only employ certified pesticide applicators for any non-emergency pesticide use in the school buildings or grounds. However, someone other than a certified pesticide applicator may apply a pesticide in an emergency to eliminate an immediate human health threat when (1) it is impractical to obtain the services of a certified pesticide applicator and (2) a restricted use pesticide is not used

A “**pesticide**” is defined as a fungicide used on plants, an insecticide, a herbicide, or a rodenticide but does **not** mean a sanitizer, disinfectant, antimicrobial agent or pesticide bait.

“**Integrated pest management**” is defined as the use of all available pest control measures, including the judicious use of pesticides when warranted to maintain a pest population at or below an acceptable level while decreasing the unnecessary use of [pesticides].

A “lawn care pesticide” is defined as pesticide registered by the EPA and labeled according to the Federal Insecticide, Fungicide and Rodenticide Act for lawn, garden and ornamental use.

The Board is committed to minimizing the use of pesticides. Therefore, the primary practice of pest control shall involve reducing/eliminating the conditions necessary for pest survival. These measures include but are not limited to good housekeeping and routine, prompt maintenance of buildings and grounds.

The application of lawn care pesticides on the grounds of elementary schools must be according to an integrated pest management plan (IPM). Such application is prohibited starting July 1, 2008 except in emergencies. An emergency application may be made to eliminate a human health threat as determined by the Superintendent of Schools.

As required by state statute, the District shall:

- Annually inform parents/guardians and staff of the District’s pest application/management policy and a description of any pesticide applications made during the previous school year.
- Establish a registry of parents/guardians and staff who want to receive advance notice of all pesticide use and provide such notice.
- Provide notice of planned pesticide application to students, parents/guardians and employees.
- Make pesticide applications only after regular school hours or planned activities.
- Maintain written records for five years of all pesticide applications.
